Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Furusawa (US 2002/0151161) in view of Geddes et al (US Patent 6,766,734).

Furusawa discloses a method for forming a conductive film pattern. This method comprises forming film 12 on substrate 11, applying a particle dispersion solution 14 using an ink jet printing method and converting the solution to a conductive film 16 by heat treatment in an oven. See paragraphs [0042] through [0055].

However, Furusawa does not disclose the adhesive face in the manner claimed by the applicant. Regarding this difference, the applicant is directed to the reference of Geddes.

Geddes discloses a transfer sheet for ceramic imaging. As shown in the figures, substrate 12 is provided with a pressure sensitive adhesive 412 and an ink image 222. It appears from the figures that the adhesive 412 completely covers the base of the substrate 12 in the manner claimed by the applicant.

It would have been obvious to one having ordinary skill in the art to employ an adhesive composition completely covering the base of the substrate, as taught by Geddes, in the method of Furusawa in order to enhance adhesion of the materials. In

addition, without the disclosure of unexpected results, it is the examiner's position that the specific materials employed as well as the concept of and stacking the substrates are well known and conventional in the art and would have been obvious to employ in the above-described method of Furusawa in view of Geddes based on desired properties of the articles being manufactured.

Response to Arguments

3. Applicant's arguments with respect to claims 1-15 have been considered but are moot in view of the new ground(s) of rejection.

Telephone/Fax

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Sells whose telephone number is (571) 272-1237. The examiner can normally be reached on Monday-Friday between 9:30 AM and 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chris Fiorilla can be reached at (571) 272-1187. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 1734

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

A handwritten signature in black ink, appearing to read 'J. Sells', with a horizontal line drawn underneath it.
